

Reducing for Good - New HFO for foam reduces GWP in Kolpak units by over **1,400%**

Kolpak products now use environmentally friendly HFO blowing agent in foam in all of their products. HFO foam blowing agent has a GWP (Global Warming Potential) of only 1 ppm. Over 1,400 parts lower than standard HFC blowing agent.

**Advantages of HFO blowing agent in foam:**

- HFOs are non toxic
- No ozone depletion potential
- Non-flammable
- Non-volatile organic compound - according to the EPA
